Aerial Delivery and Field Services Department

Environmental Considerations

Aerial Delivery and Field Services *Purpose of The Malfunction Department*

In all incidents or malfunctions the Malfunction Officer/NCO will immediately conduct an on-site investigation to determine, if possible, the cause(s) and to protect the physical evidence which is extremely perishable

Aerial Delivery and Field

Priority of a Malfunction

Department

The investigation of personnel parachute and equipment malfunctions/incidents shall receive the highest priority, secondary only to medical aid for the injured. It shall supersede all other aspects of the operation, including any tactical exercise planned in conjunction with the airborne operation

Aerial Delivery and Field Services Department

The Malfunction Officer/NCO

Aerial Delivery and Field

Qualifications of The Service of The Malfunction Department

Army Qualification Requirements

Malfunction Officer/NCO shall be:

- **An Officer, Warrant Officer or NCO (minimum 92RA9 grade of E-5)**
- **A trained Parachute Rigger (92R, 921A or 92AR9) IAW AR 750-32**
- **Familiar with the airdrop equipment being utilized**

Aerial Delivery and Field

Qualifications of The Malfunction Officer/NCO Department

Army Qualification Requirements (cont)

**Malfunction Officer/NCO must be qualified for:
Static line personnel parachutes not including
Ram Air**

Personnel Parachute System (RAPPS)

- **Pack-in-process inspector certified**
- **Malfunction Officer trained and certified**

Aerial Delivery and Field

Qualifications Set The Malfunction Officer/NCO Department

Army Qualification Requirements (cont)

RAPPS (to include static line deployed RAPPS if applicable)

- **Pack-in-process inspector certified**
- **Malfunction Officer trained and certified**

Aerial Delivery and Field

Qualifications Service Malfunction Officer NCENT

Army Qualification Requirements (cont)

Ram air cargo (RAC) airdrop

- **Pack-in-process inspector certified**
- **Malfunction Officer trained and certified**
- **RAC trained and certified (if applicable)**

Aerial Delivery and Field

Qualifications Set The Malfunction Officer/NCO Department

Army Qualification Requirements (cont)

Cargo Airdrop

- **JAI trained and certified (not required for door bundles)**
- **Malfunction Officer trained and certified**

Aerial Delivery and Field

~~Qualifications of The~~ ~~Malfunction~~ ~~Department~~

Army Qualification Requirements (cont)

- **Malfunction Officers will be trained and certified in accordance with the power point presentation and lesson plans provided by the USAQMC&S**
- **Individuals will be retrained and recertified annually**
- **Training/certification records will be maintained on file at the unit level**
- **The organization that provides the parachutes will provide the Malfunction Officer**

Aerial Delivery and Field

Qualifications of The Malfunction Services Officer/NCO Department

Army Qualification Requirements (cont)

Exception:

- The MO qualifications may be waived to an MOS 92R1P(E-4 only) when recommended by the parachute rigger warrant officer (MOS 921A) in charge of that organization or other authorized unit supervisors in accordance with AR-750-32
- Qualified and authorized E-4 MOs will be limited to single ship missions only
- Army National Guard and U.S. Army Reserve personnel meeting above requirements are considered qualified MOs as civilian technicians

Aerial Delivery and Field

Qualifications of The Malfunction Department Officer/NCO (Cont.) Air Force Qualification Requirements

Malfunction Officer/NCO shall be:

- **Minimum grade of E-4 and hold an Air Force Specialty Code (AFSC) of 1A2X1, 2T2X1 or 2A7X4**
- **Attend the Airdrop Load Inspector Certification Course**
- **Attend a Joint Airdrop Inspector (JAI) refresher course annually and be designated, in writing, by the unit commander**

Aerial Delivery and Field

Qualifications of The Service Malfunction Department Officer/NCO (Cont)

Air Force Qualification Requirements (cont)

- **For Air National Guard units, AFSC 1C2X1 and 1T2X1 personnel may also perform duties**
- **For Air Force Special Operations Command, Special Tactics Squadron, Parachute Rescue, Special Operations Weather Team unilateral operations, the drop zone (DZ) controller may be designated as the Malfunction Officer if an Air Force JAI is not available**

Aerial Delivery and Field

Qualification of The Malfunction Department Officer/NCO (Cont) Navy Qualification Requirements

Malfunction Officer/NCO shall be:

- **A Parachute Rigger NCO, (E4) or above, or a Jumpmaster qualified E-5 or above, and will be appointed, in writing, by the Commanding Officer**

Aerial Delivery and Field

Qualifications for the Malfunction Officer/NCO (Cont) Department

Marine Corps Qualification Requirements

Malfunction Officer/NCO shall be:

- **A Parachute Rigger NCO, E4 or above, or Jumpmaster qualified E5 or above, and must be appointed in writing by the Commanding Officer**
- **Must receive unit level refresher training annually**
- **Will be from the organization that provides the air items**

Aerial Delivery and Field

Duties and

Responsibilities

Routine Procedures

- Receive a briefing from the Parachute Rigging Facility (PRF) before assuming duties as the Malfunction Officer/NCO
- Review AR 59-4/AFJ 13-210(I)/OPNAVINST 4630.24D/MCO 13480.1C and unit Standard Operating Procedures prior to conducting duties

Aerial Delivery and Field

Duties and Responsibilities (Cont)

Routine Procedures (Cont)

- **Coordinate with the DZ party**
- **Check malfunction kit for minimum required equipment**
- **Coordinate transportation and communication requirements**

Aerial Delivery and Field

Minimum Required

Equipment

Minimum Required Equipment TAW AR 59-4/AFJ 13-10(I)/OPNAVINST 4630.24D/MCO 13480C

- **Communication capability with the DZ Control Party**
- **Binoculars or night vision devices**
- **Transportation to move around the DZ**
- **A good quality camera (video camera preferred)**
- **Clerical supplies necessary for tagging equipment, taking statements, and initiating reports**

Aerial Delivery and Field

Minimum Required Equipment

(Cont)

Minimum Required Equipment IAW AR 59-4/AFJ 13-10(I)/OPNAVINST 4630.24D/MCO 13480C (Cont)

- **An approved wind meter**
- **Applicable DZ survey**

- Measuring tape

Aerial Delivery and Field

Definition of a

Malfunction

A malfunction is defined as “the failure of an airdrop item or component of an airdrop system to function as it was intended or designed,” whether the equipment failed due to human error, material failure or emergency procedures used

Aerial Delivery and Field

~~Key Terms~~ Services

Department

- **Partial Malfunction:** The failure of an airdrop system to function properly to the point that the load or parachutist is subject to damage or injury
- **Total Malfunction:** The complete failure of the airdrop system to function as designed
- **Airdrop Incident:** Procedure which prevented the successful completion of any planned airdrop operation

Aerial Delivery and Field

~~Key Terms (Cost)~~

Department

- Chain-of-Custody: A chronological written record of people who have had custody of evidence from the initial acquisition until final disposition
- On-site Investigation: Performed by the Malfunction Officer to collect data used to determine the cause of the malfunction
- Follow-On Investigation: Normally conducted by a board appointed under the appropriate regulation of the service involved

Aerial Delivery and Field ~~Services~~ ~~Check out~~ ~~Learning~~ Department

Aerial Delivery and Field

Question: What service minimum required equipment?

**Department of Defense
AWAR 59-4/AFJ 13-210(I)/OPNAVINST 4630.24D/MCO**

- **13480.16?**
• **Communication capability with the DZ Control Party**
- **Binoculars or night vision devices**
- **Transportation to move on the DZ**
- **A good quality camera (video camera preferred)**
- **Clerical supplies**
- **Approved wind meter**
- **Applicable DZ survey**

Aerial Delivery and Field

Services

Question: What is the definition of a malfunction?

Department

1. A malfunction is defined as “the failure of an airdrop item or component of an airdrop system to function as it was intended or designed,” whether the equipment failed due to human error, material failure or emergency procedures used

Aerial Delivery and Field *Malfunction Investigation Procedures No Serious Injuries* Department

Conduct a complete on-site investigation of the malfunction IAW AR-59-4/AFJ 13-210(I)/OPNAVINST 4630.24D/MCO 13480.1C Chapter 3-2b. and Appendix B, Section B-4a

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries **Department** **(Cont)**

- Notify the PRF that provided the parachutes
- Ensure the Subject Matter Expert (SME) is asked for to assist the Malfunction Officer/NCO

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries Department (Cont)

- Secure the impact site
- Photograph all equipment and obvious defects, to include any damage caused by impact
- Sketch the impact site and show equipment relationships and exact location of impact site in relation to the DZ

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries Department (Cont)

DZ Sketch Information:

- **DZSO - name, rank, location on the DZ**
- **Assistant DZSO - name, rank, location on the DZ**
- **Malfunction Officer - name, rank, location on the DZ**
- **Assistant Malfunction Officer - name, rank, location on the DZ**
- **Impact point using grid coordinates**
- **Direction of flight**
- **Wind direction and speed**

Aerial Delivery and Field Malfunction Investigation Procedures No Serious Injuries (Cont)

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries

Department

(Cont)
Obtain statements from:

- Preceding jumpers
- Subsequent jumpers
- Jumpmasters
- Safeties
- Ground observers, DZ party, other jumpers, etc
- Aircraft personnel (if possible)

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries Department (Cont)

Procedures:

- **Gather equipment, air items, and personal property involved in the malfunction. In addition gather all necessary clothing as soon as possible**
- **A hand receipt may be needed for accountability of confiscated equipment**

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries

Department
(Cont)

- Tag all items with date, time, location, type of incident, name, and unit of person involved
- The Malfunction Officer/NCO is responsible for maintaining the “chain of custody” for evidence
- Examine equipment component-by-component
- Conduct a TM 10-1670/TO 14D1-2 series/NAVAIR/NAVSEA series/rigger-type inspection in an appropriate area on all air items

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries Department (Cont)

- Ensure all air items and evidence is retained until the investigating authority releases them
- Release equipment not required for further investigation

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries

Department
(Cont)

During an investigation for personnel
parachute

jumps if intentional acts of tampering or
sabotage is suspected:

- The DZSO will immediately notify the Military Law Enforcement Authorities
- When Law Enforcement arrives the Malfunction Officer/NCO will brief them on actions already taken and release all evidence into their custody

Aerial Delivery and Field

Malfunction Investigation Procedures No Serious Injuries **Department** **(Cont)** **Appendix B**

Investigations Involving
Serious
Injuries or Death IAW AR 59-
4/AFJ 13-
210(I)/OPNAVINST
4630.24D/MCO
13480.1C**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death

Conduct a complete on-site investigation of the malfunction IAW:

- **AR-59-4/AFJ 13-210(I)/OPNAVINST 4630.24D/MCO 13480.1C**
- **Chapter 3-2c. and Appendix B, Section B-4b**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

- Notify the Rigger Facility SME to assist the Malfunction Officer /NCO
- Ensure the DZSO immediately notifies the Military Law Enforcement Authorities
- Ensure the DZSO notifies the aircraft involved
- Immediately impound the Parachute Log Record

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

Access to the Accident Scene:

- **Restricted to the Malfunction Officer, the advising SME, responding Military Law Enforcement Authorities, DZSO and medical personnel**
- **Attempt to limit Command Personnel present and disperse on-lookers**
- **The Malfunction Officer will immediately initiate an on-site investigation**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-Site Actions:

These Are The First Critical Steps

- **Immediately place the impact site off-limits**
- **Posts guards to ensure the integrity of the accident scene; ensure site remains undisturbed**
- **Investigation will not interfere with any required medical support**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

Obtain statements from:

- Preceding jumpers
- Subsequent jumpers
- Jumpmasters
- Safeties
- Ground observers, DZ party, other jumpers, etc
- Aircraft personnel (if possible)

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site Actions (cont)

- **Ensure statements include: Name, Unit and POC**
- **Photograph all equipment, parachutist, impact site and any obvious defects in the equipment**
- **Sketch the impact site**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont):

- **Gather and secure all clothing, equipment, air items, and personal property involved in the malfunction. Record with hand receipt for accountability and release only to the appropriate SME**
- **Tag all items with time, date, location, type of incident, name, and unit of person involved.**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont):

- Impound the parachute log record book ASAP limiting access to appointed investigative authorities
- Conduct a detailed component-by-component examination of all equipment after the parachutist has been evacuated

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont.)

- **Do not remove entanglements**
- **Ensure equipment is tagged, parachutes are loosely rolled and bagged when the on-site investigation is complete**
- **Secure and release only to assigned investigating SME**
- **Request D-bags be segregated, undisturbed, and advise Safeties - Do not untangle the D-bags**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont):

- **Ensure the aircraft involved is notified as soon as possible for inspection before being reconfigured**
- **Secure a copy of the manifest and reconstruct the stick from manifests if needed**
- **Obtain the D-bag serial number from log record book and validate the D-bag by serial number**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont):

- **Conduct a TM 10-1670/TO 14D1-2 series/NAVAIR/NAVSEA series/rigger-type inspection in an appropriate area on all air items**
- **Complete on-site investigation IAW AR 59-4/AFJ 13-210(I)/OPNAVINST 4630.24D/MCO 13480.1C App B**

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont):

- If medical support determines jumper must be cut from parachute system the Malfunction Officer will assist if requested
- Record/Tag all areas of parachute system that are cut by medical personnel to distinguish from incident related damage
- Medical personnel secure/preserve all clothing and equipment removed from impact site

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

On-site actions (cont.)

- If suspected tampering/sabotage notify Military Law Enforcement Authorities
- Be prepared to brief Authorities
- If tampering/sabotage is evident - investigation ceases and all findings are turned over to investigating agency
- If agency accepts findings of no tampering Malfunction Officer investigation continues

Aerial Delivery and Field

Malfunction Investigation Procedures Serious Injuries or Death (Cont)

- All air items involved in a fatality must be secured until 90 days after completion of the investigation and submission of all reports IAW applicable regulations
 - This is done should there be any inquiries pertaining to the investigation or if for any reason any part of the investigation needs to be reopened

Aerial Delivery and Field Services Department

Check on Learning

Aerial Delivery and Field

Question: In a malfunction involving Department serious injury or death, what should the Malfunction Officer/NCO do with the Parachute Log Record?

The Malfunction Officer / NCO should impound it

Aerial Delivery and Field

Services

Question: All Air items involved in a Department fatality must be secured for how many days after completion of the investigation and submission of all reports?

In case of any inquiries or any part of the investigation needs to be reopened reports and why?

airdrop load malfunction investigations
which contains guidelines for component
inspection procedures**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

The malfunction officer will categorize malfunctions by the phase in which they occur and also restrict the investigations to factors that could have caused or contributed to the malfunction to save time and resources.

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Phases of Airdrop

- **Extraction Phase**
- **Deployment/Recovery Phase**
- **Release Phase**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Phases of Airdrop (Cont):

Extraction Phase:

- The period of time that begins with the activation of the aerial delivery system and continues until the extraction force transfers to recovery parachute deployment

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Phases of Airdrop (Cont):

Deployment/Recovery Phase:

- **The period of time that begins with the transfer of force extraction to recovery parachute deployment and continues until load impact**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Phases of Airdrop (Cont):

Release Phase:

- **This phase overlaps the deployment/recovery phase, but concerns only the functioning of the release assembly**
 - **Starts when timer actuates**
 - **Continues until the load impacts the ground and parachute release occurs**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop **Department** **Low Loads (Cont.)**

**Failure of the Extraction Parachute to Deploy or
Inflate:**

- **Did the aircraft extraction parachute release mechanism function properly?**
- **Were bag closing ties correctly made and pendulum lines properly installed?**
- **Was the parachute safety loop free from the bent V-ring?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure or Delay in the Load Extraction:

- **Did the extraction parachute appear to fully inflate?**
- **Was positive aft restraint removed?**
- **Was the correct number of detents and restraints settings used for the load?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure or Delay in the Load Extraction (Cont):

- **Was the correct extraction line used and connected?**
- **Was the platform damaged (answer only when a load did not exit)?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure to Transfer the Extraction Force to Deployment:

- **Were actuators installed in the correct platform rail position (check the arm and foot to indent clearances)?**
- **Were actuator arm safety pins removed and correctly stowed?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont) Low Velocity Airdrop Loads (Cont)

Failure to Transfer the Extraction Force to Deployment (cont):

- **Was the EFTC cable secured or attached to the actuator and latch assembly with cable clevis pins installed?**
- **Was the EFTC cable the correct length and properly routed and secured?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure of Recovery Parachutes to Deploy:

- **Was the deployment line attached to the extraction system and the parachutes?**
- **Was the deployment line misrouted?**
- **Were the parachute restraint and release straps properly attached?**
- **What was the condition of the release knives?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Static and or Release Line Systems (Dual Row Airdrop System [DRAS], Enhanced Container Delivery System [ECDS], and Door Bundles):

- **Was the static line properly rigged and connected to the anchor cable?**
- **Was the static line properly rigged and connected to the parachute?**
- **Was the release line rigged and connected correctly?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure of the Suspension System:

- **Did the load suspension points fail?**
- **Did the suspension slings or attaching hardware fail?**
- **Were the correct slings used?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure of the Suspension System (cont):

- **Were the slings correctly attached to the parachute release and the load or platform?**
- **Were slings correctly routed to the suspension points?**
- **Was protective padding used where it was required?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure of Recovery Parachute(s) to Fully Inflate:

- **Were reefing line cutters armed and cotter pins removed?**
- **Did the cutters fire?**
- **Did the cutters cut the reefing line?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure of Recovery Parachute(s) to Fully Inflate (cont):

- **Was the reefing line the proper length?**
- **Was the reefing line entangled in the reefing rings or suspension lines?**
- **Were the canopy, suspension lines, and connector link ties correctly made?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Midair Release (check hydraulic releases IAW FM 4-20.102):

- **At what point did the midair separation occur?**
- **Did the release activate prior to the load stabilizing?**
- **Were the releases attached to the parachutes and the load?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Low Velocity Airdrop Loads (Cont)

**Midair Release (check hydraulic releases IAW
FM 4-**

20.102) (cont):

- **Were the releases properly rigged?**
- **Was the timer serviceable when tested after the drop? What deficiencies were noted (specify part, M-1 or M-2 release)?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Low Velocity Airdrop Loads (Cont)

Failure to Disconnect for M-1 or M-2 Parachute

Releases:

- **Did a no-load condition occur on impact?**
- **Did the release upper-suspension link rotate to the release position?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Failure to Disconnect for M-1 or M-2 Parachute Releases (cont):

- **Was the arming wire lanyard the correct length and was the arming wire pulled from the timer?**
- **Did the timer keys retract and the timer fall in the guide block?**
- **Was the timer serviceable when it was tested after the drop?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont) Container Delivery Systems

Failure of the Containers to Exit the Aircraft:

- **Was the release gate properly rigged?**
- **Was the knife sharp and attached?**
- **Did the aircraft release system function properly?**
- **Condition of the rollers and skid board if the containers were jammed in the aircraft?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Loads (Cont)

Container Delivery Systems (Cont)

Failure of the Recovery Parachutes to Deploy and Inflate:

- **Were the parachute static lines attached to the anchor cables and were the anchor cable stops installed at the prescribed location?**
- **Were the parachutes attached to the containers?**

Aerial Delivery and Field

Malfunction Investigation Procedures Involving Airdrop Department Loads (Cont)

Container Delivery Systems (Cont)

Failure of the Recovery Parachutes to Deploy and Inflate (cont):

- **Were the pilot chutes attached to the cargo parachutes?**
- **Were the bag closing ties made with prescribed materials?**
- **Were the canopy and suspension line ties properly installed with prescribed material?**

JUMPER'S EQUIPMENT WORN: Alice Pack, M1950, LCE, M-4, MICH, Camel Back

JUMPER'S POSITION (PASS / STICK / POSITION): Pass2/ Stick 2/ Jumper#21 (left door)

NUMBER OF JUMPS JUMPER HAS: 71

RESULTING INJURY:
Jumper suffered fractures to his right leg (Tibia and Fibula), .

DESCRIPTION OF SUSPECTED MALFUNCTION/INCIDENT/DAMAGED INCURRED:
., Jumper exited without incident. Parachute opened and Jumper states he saw a hole in the canopy, compared his rate of decent, and decided to activate his reserve. Reserve deployed properly. Jumper landed on uneven terrain with feet apart resulting in the fractures. Upon inspection of parachute, gore 26, section 5 had a hole in the canopy. The left and right radial seams were damaged (approximately 5 inches up from the lower lateral band) due to nylon to nylon contact that caused a small burn. The burn appears to be the originating point of the tear that produced a 20 inch hole located near the radial seam of gore 26. No burns or damage were found on any other parts of the parachute system. No damage was found on the jumpers equipment or uniform.

SUSPECTED CAUSE OF MALFUNCTION/INCIDENT:
., Canopy was improperly placed into the deployment bag / improper packing procedures.
